ABOUT THE WORKS

Pad printing machines built in Thane, and everything they run on.

Who we are

Gaurav Industries is a proprietorship established in 2017 and run as a manufacturer by Suryabhan H. Singh. Our works is at A-379, M.I.D.C., Ram Nagar, Road No. 28, Wagle Industrial Estate, Thane (West), Maharashtra 400604. The registered office is at A-103, Vishwakarma CHS Ltd., Savarkar Nagar, Thane 400606.

What we manufacture

We build pad printing machines from single-colour manual benches through to four-colour and conveyor-fed automated indexing lines, along with dedicated machines for LED bulbs, toys, pens and MCB bodies. Alongside the machines we supply the running items a pad printing line consumes: Marabu pad and screen printing inks with matching thinners, silicone and rubber pads in a range of hardness grades, cliché plates etched from your artwork, and ground ceramic ink-cup rings.

Industries we print for

MCB & Switchgear, Toys, Pens & Stationery, LED Bulbs, Automotive Components, Houseware & Plastics, Cosmetics Caps & Closures, Promotional Products. Each of these needs a different fixture, pad shape and ink, and that choice is settled before we quote.

No monetary values appear in this catalogue. Quotations are issued against the component, the configuration, the tooling and the quantity — please request one for the items you need.

What you get when you order

- **A machine built for your part.** Send us the component and the print area. The pad, the plate and the fixture are sized around it rather than around a standard build.
- **Testing on your own sample component.** Before dispatch the machine is run with your actual part, your artwork and the ink chosen for your substrate, so the print is signed off on the job it was ordered for.
- **Installation support.** We help get the machine set up and running on your floor, and set the pad, plate and ink so the line starts on a known-good print.
- **Consumables and spares from the same works.** Pads, inks, cliché plates and ceramic rings are supplied against your part numbers, direct from Thane, so a running line does not wait on a second vendor.

VISITING

Customers are welcome at the works to bring a sample component and watch it printed on the machine before ordering. Call or WhatsApp **+91 93240 88527** to arrange a time.

PAD PRINTING MACHINES

SPL. One Color Pad Printing Machine

Single colour manual machine for high volume runs on small moulded parts.

Operation	Manual
Colours	1 Colour
Output	1500 pcs/hr
Speed	1200 impressions/hr

Request a quote — +91 93240 88527 · gauravindustries379@gmail.com

PAD PRINTING MACHINES

Four Color Pad Printing Machine
